Work Contribution Declaration

Project Title: Dig Dug

Course: Software Developmet ELEN 3009A

University: University of the Witwatersrand

Project Submission Date: October 2025

Partner Contributions:

TABLE 1: Work Contribution Table

Task	**MABASA DYONDZO CYRIL**	**KHOSA KHOSCHA**
Research and Planning	Ghost algorithms and use of raylib	-movement and use of raylib
Design and Development	Designed the ghost behavior and algorithms and the overall game structure	Designed the Dig Dug behavior and Developed the core game mechanics
Coding and Implementation	Coded and implemented the ghost behavior and algorithms the game logic to handle the interaction between game elements and rocks implementation	Coded and implemented Dig Dug movement and behavior and Implemented the core game mechanics related to player control, collisions, and scoring
Testing and Debugging	Collaboratively conducted game testing	Collaboratively conducted game testing
Report Writing	Report writing and literature review	Report writing and literature review
Documentation	Collaboratively Created Doxygen documentation	Collaboratively Created Doxygen documentation

Discretionary Marks:

We allocate the following discretionary marks to each other based on our contributions to the project.

MABASA DYONDZO CYRIL: 5%

KHOSA KHOSCHA: 5%

Declaration:

By signing below, we confirm that the contributions stated above are accurate, and we agree to the discretionary marks specified.
